Water Connection Agreement

In consideration of the Bona Vista Water Improvement District supplying culinary water to the property listed below, we will pay _____ for a _____ connection to the District.

Street Address: _____

Subdivision: _____

Lot #: _____

Secondary Water:

Culinary water is not allowed to be used for irrigation or secondary purposes. Proof of secondary water must accompany this agreement. Accepted proof is a receipt from a pressurized secondary water provider or copies of water shares (in the property owners name) along with a letter from the water company verifying that there is 3-acre feet of water available per acre of undeveloped ground.

Meter Boxes:

Meter boxes should be located between the curb and the sidewalk. The meter box and lid must be up-to-grade and plumbed in accordance to the District's specifications (Details and drawings are available at our office and can be found online at www.bonavistawater.gov). No meter box shall be located in the driveway or encased in a hard surface such as cement or brick. On commercial lots, if all of the frontage is hard surface, the contractor must have the location, meter box, ring and cover all approved by the District before any work is done. Meters shall not be set if the above conditions are not met.

Jumpers:

Jumpers are not allowed as meters can be set at any time for construction purposes. Any jumper found will be taken by the District and an \$85.00 fee will be charged to the contractor/person listed below regardless of who installed it. In the winter months, if necessary, a special arrangement can be made. The District will furnish a jumper at a nominal fee and then set the meter at a more appropriate time.
